The bleed of channels has slowed, as quite a few of these membership losses were bans of bot/scam accounts in both the main channel and the trading channel. It may have been mitigated by the recent pump and on-boarding of newcomers.

As per community plan I have recently returned to hosting a movie event for the Firo community as per request from a community member, and I am planning on adding another similar event per week. With help from Ajay I have been working on a future community event for Firo focusing on a more guerrilla marketing campaign. Taking inspiration from Monero and BTC for it. It'll have two parts with both parts overlapping. Firo's introductory to technology post was completed and posted on the various mediums including the BPSAA. We were contacted by a member of Lemmy.World who had created a community for Firo on their website. I reached out yesterday and received mod position for the community today.

If you would like to hear more about what I have planned for this upcoming event, please feel free to contact me as I don't reveal the plans to the open channel.
